Caleb Stromberg

General Information: *Updated February 10th, 2026*

    Email: calebstromberg@gmail.com
    Website: calebstromberg.com
    Github: github.com/Corncycle

Technologies: Typescript/Javascript, Java, React.js, three.js, webpack, Express, Git, Github, PostgreSQL, Kibana, Tailwind, HTML, and CSS.

Work History:

Aug 2024—Dec 2025: **Software Engineer II** - Hyperproof
        Expanded and maintained a two-way sync between Hyperproof and a partner auditing system, built in C# with Azure functions. Created a Kibana dashboard to track metrics and failures. Subsequently contributed to Hyperproof core features in Java, React with Typescript, and Go.

Aug 2023—Aug 2024: **Software Engineer I** - Hyperproof
        Remotely collaborated on an integrations codebase written in Typescript. Wrote templated integrations with internal tools, and resolved bugs and extended features in the integrations SDK.

Sep 2020—Sep 2022: **Graduate Teaching Assistant** - Western Washington University
        Lectured and assessed undergraduate math students in introductory courses. Experienced with both remote and in-person instruction.

Education:

Master of Science in Mathematics
    Western Washington University, 2020—2022. Graduated June 2022 with a 4.0 GPA

Bachelor of Science in Mathematics, magna cum laude
    Western Washington University, 2016—2020. Graduated June 2020 with a 3.94 GPA

Projects:

Ultimate Stage Data (Live) (Github) – React, Node.js, Express, MongoDB, Tailwind, Pug
A web application serving stage-dependent statistics from Smash Ultimate tournaments.

- Processed outcomes of over 6 million tournament matches and stored data in a MongoDB Atlas database using Mongoose and asynchronous queries to `start.gg's GraphQL API`
- Wrote a dataset update routine running weekly with `node-schedule`
- Structured a MVC framework using Pug templates with Tailwind for the user interface, served by an Express server
